IMPROVEMENT PRACTITIONER

DURATION: 14-18 months **LEVEL:** 4

PURPOSE:

To develop higher level process improvement skills using a blend of Lean and Six Sigma. Apprentices will be able to lead critical improvement projects to deliver change within the business.

WHO IS IT FOR?

Employees who are responsible for, or looking to drive, business improvement in any sector. Anyone who deals with issues that need rapid problem-solving or in-depth analysis to implement sustainable solutions.

KEY CONTENT

Apprentices will be able to apply the principles, methods and tools of process improvement. They will develop overarching leadership and project management knowledge and skills.

BUSINESS BENEFITS

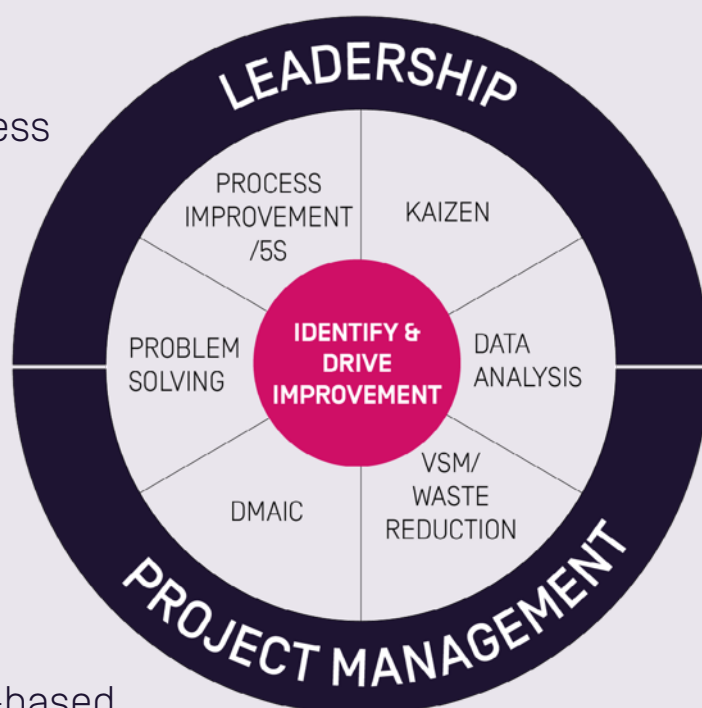

The apprentice will be a highly-skilled problem solver who will drive the business forward.

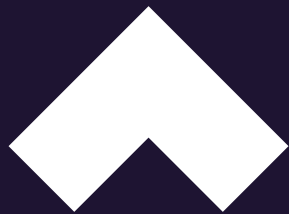

They will improve overall company performance by implementing a work-based change project during the programme with coaching support from their Axia trainer.

The project will be based on organisational need to eliminate resource and process waste, improve efficiency and quality, make sustainable savings and develop a culture of continuous improvement.

DELIVERY

The course can be delivered remotely, face-to-face or a blend of both. Sessions will be interactive and engaging and aligned to specific practices and approaches in your business.
